2024 New Year Day Cruise

by Joe Keller

Dana Stevens and I volunteered to plan the 2023 NTD during a 2022 Tri-five meeting. The weather last new years day had other plans. We canceled the cruise the day before and were proven right. It rained all day on January 1, 2023.

We tried to plan a make up cruise last spring, but could not find a good replacement date due to our active car show calendar that members were committed to. Last fall, Dana and I started again to come up with a plan for the 2024 NYD cruise.

This year's cruise met at the Mc Donalds in Valley Center bright and early and set off on the 55 mile cruise up along side Mt Palomar past Lake Henshaw and San Isabel to beautiful downtown Julian.

Dana was the cruise leader and did an excellent job keeping the 10 classics together. We made one short pit stop at a Cleveland National Forest rest stop. The temperature was around 30 degrees with a cold wind. So it did not take long to see the vista and get back on the road. Traffic was light that morning and we made it on schedule to our lunch reservation in Julian at the Julian Brewing and BBQ Co. They had offered our cruise members reserved off street parking and reserved seating in a warm dining room.

As our caravan of classics drove the length of main street, there were lots of people stopping and taking photos and videos as we drove by.

The temperature in Julian was brisk and we parked and entered the restaurant quickly. The food was good, (as a Texan who thinks of brisket as a delicacy it was a little dry) and our group had plenty of time to visit before some of the group departed for home.

Several of us decided to do some walking around main street. We visited stores and was amazed as to how many people were in Julian for the day. The waiting line for Mom's apple pie shop stretched the whole block. So we decided to pass on a warm piece of pie.

The drive down to San Diego was also good with light traffic.

Dana and I wish to thank everyone that came along with us on the cruise and help make it a fun day.

Getting Tom & Nancy Geiman's '55 Chevrolet Belair Wagon Road Ready for The Tri-Five Nationals

Submitted by Wayne Hartwig

Tom & Nancy Geiman have made plans to attend the Tri-Five Nationals in Bowling Green, Kentucky this August and they were looking for a road ready Tri-Five Chevy to take on the trip. After a lengthy search and seeing too many overpriced cars that needed too much work, they purchased a pretty turquoise and white '55 Belair four-door wagon, knowing it had some issues and needed some work to make it roadworthy for the trip. The car definitely had its share of problems, but the price made it a good overall buy.

The car was recently restored with good paint, chrome & stainless trim, and a nice interior. It has a freshly rebuilt 265 Cubic inch engine, a 700R4 transmission, power disc brakes, power steering and air conditioning. That being said, the builder or builders of the car must not have been the best when it came to mechanical assembly and wiring, as many things needed a lot of TLC.

Problem #1: Although the engine was freshly rebuilt, it did not run smooth and seemed to have a miss of some kind and it stumbled on acceleration. It was supposed to have been recently rebuilt by a reputable rebuilder and had only a few miles on it, so we decided to check everything out to identify the problem. We pulled the plugs and performed a compression test. All cylinders had good compression. Spark plugs looked like new, and gaps were perfect, the distributor was original with points and condenser and the wires were new too. The carburetor appeared to be part of the stumbling problem, so we rebuilt it. Great, no more stumble! But as it warmed up, it ran worse and worse. Spraying a little carb cleaner along the intake manifold revealed a vacuum leak that became worse when hot. Removal of the intake manifold revealed the installer used the wrong gaskets with ports larger than the original 265. We replaced the gaskets with the correct ones and readjusted the valves, and wa-lah, now it runs great.

Problem #2: It leaked engine oil at the front and back of the oil pan. Once again poor workmanship was the problem. When we drained the oil, we discovered there was no gasket on the drain plug and it was part of the leaking problem. It was difficult to determine if the rear pan leak was a main seal problem, so when we pulled the pan, we also replaced the rear main seal with the modern neoprene replacement seal. A new pan gasket and a new drain plug gasket resolved those pesky oil leaks.

Problem #3: The 700R4 transmission did not shift properly and shortly after would not go into overdrive. A trip to the transmission shop revealed there was metal and other debris in the pan. A trip to Bob Harrington revealed it needs to come out and taken apart to evaluate the issues. That will come next month.

Problem #4: The heater box had a coolant leak. Removal and disassembly of the heater revealed it had a new core and a new control valve, but someone forgot to tighten one of the clamps. Easy fix and it was reinstalled with some new seals.

Problem #5: The Mark IV under dash air conditioning was not working. Everything looked new except for the under dash evaporator. The refrigerant had leaked out, so we took each connection apart to check for problems. The first one revealed the cause of the problem. More poor workmanship, the low pressure hose connection at the compressor was leaking.

The O-ring was folded over and nearly cut in half. After checking all connections and replacing all of the O-rings, the leak problem was solved, but there seems to be an issue with the evaporator electrical system. More on that problem later.

Problem: #6: The turn signal switch worked but had no detents to center it in the off position and it did not cancel. Removal of the steering wheel revealed all of those parts were completely missing. With all new parts installed and a new flasher too, the turn signals now work perfectly.

Problem #7: The backup lights were not working. Wiring was there, but not properly installed. A little wiring work took care of that problem.

Problem #8: The PRNDL needle on the dash did not work, The wire link between the steering column and the needle was missing. A new wire fixed that problem, but with that done, a new problem was discovered. The ratio between the shifter and the transmission was wrong making it impossible to make everything line up. The lever on the transmission is a bit too short. Longer one coming soon.

Problem #9: The neutral Safety switch did not work. When the 700R4 transmission was installed, the switch should have been replaced with the proper switch, requiring a little modification to the steering column. With the new switch installed, all is good.

Problem #10: No wiper motor. There was a vacuum unit in a box in the back of the car, but vacuum wipers just don't get the job done. An electric wiper unit was acquired to replace the vacuum unit, taking care of that problem.

Still to come, the transmission will go for repair soon, the dome light does not work, seat belts will be installed, A/C will be repaired, driver's door window will be replaced, brakes will be inspected and differential may need to be rebuilt.

Now you may be thinking that there were just too many issues with this car for it to be a good deal. But in reality, it is a really nice car that is quickly becoming a very nice reliable 1955 Classic Chevrolet Belair road car. Tom & Nancy will be cruising in style for a long time to come!

Bob's "What The Hell Is It?"

This month's mystery item. The Trico logo should be a clue for most of you.

Good Luck!

Bob Bishop

Bob,
I believe this tool is used to spread the bead apart on tires.

Steve Baker

Congratulations Steve your correct it is a tire bead spreader.

Tri-5 Blast to the Past

It was twelve years ago we started hosting a Tri-Five January weekend get together at the Ranch in Cibola, Arizona. We looked forward to this each year. Along with RV camping, enjoying our friends and a large mesquite steak Bar B Que we would take them for a trek to Quartzite, Az for the annual swapmeet. This swapmeet took over the entire town and would usually take us two days to see it all. We always filled the trucks and our jeep with antiques and items we couldn't live without. Fast forward thru the past five years, we stopped inviting friends because only a couple

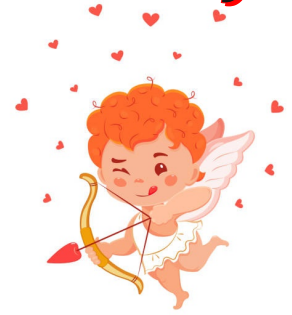

vendor lots were left to make it worthwhile. We however could still find things making the 4 hour drive worth it for us. That is until this year! Swapmeeters that they are the Hildebrands tagged along with us but we were all surprised the lot we liked to go to barely had a forth of the usual vendors. After talking to the locals we were told the county, in its infinite wisdom, no longer allowed dry camping. This means the out-of-town vendors could not stay with their wares and did not come to sell. We were very disappointed and will tell you not to waste your time going.

Tri-Five Messages, News & Correspondence

I have been recruited by Sam and Donna to help with the T5R Facebook page. If you have any fliers that should be added for upcoming events you are planning to attend, please send to me. I will also be adding a few pics of the shows we have attended and a link to our website to see all that you have shared. I will also be adding the Revolution Review monthly newsletter link. Sam will still be in charge and answering the incoming correspondence and adding pics too. Be sure to check it out if you haven't visited recently. Feel free to comment on the posts.

From a Tri-5 Revolution Kitchen

APPLE FRITTER CAKE

- 3 cups flour, sifted
- 1/4 cup sugar
- 2 TBSP ground cinnamon
- 3 tsp baking powder
- 1 tsp salt
- 2 medium apples, peeled and chopped (about 2 cups)
- 12 ounces beer or apple juice, room temperature
- 1/4 cup butter, melted

- Icing:
 - 2 cups confectioners' sugar
 - 3 to 5 TBSP 2% milk
 - 1/2 tsp vanilla extract

1. Preheat oven to 350°. Line an 8-in. square baking pan with parchment, letting ends extend up sides.
2. Whisk together the first 5 ingredients. Add apples and beer; mix just until blended (do not overmix; batter will be thick).

Transfer to prepared pan. Bake until a toothpick inserted in center comes out clean, 40-45 minutes.

3. Lifting with parchment, immediately remove cake from pan. Brush all sides with melted butter. Cool. Meanwhile, combine all icing ingredients. Spread or drizzle over cooled cake.

Claudia Gayhart

KITCHEN SCOOP ON CHICKEN AND CORN CHOWDER

I realize it is impossible for a Florida resident to complain about their winter weather without sounding whiney. After a tropical storm, tornado or hurricane we can legitimately complain, while we're being thankful the damage wasn't worse. But in the winter, we just sound foolishly entitled. We haven't had blizzards, ice storms or below freezing temperatures. However, for the past three weeks we've been having very unusual winter weather: lower temperatures(20 degrees or so lower many days), seemingly continuous grey skies (our one sunny January day so far was the 17th), wetter days and nights than usual (three times more rain for the year so far over the last). A colder, darker, wetter winter than we've experience here before. This is weather made for homemade soup. Here's a recipe for an easy and delicious Creamy Chicken and Corn Chowder. A good use for a rotisserie chicken, or you can poach or bake chicken pieces, cooking them until the juices run clear or the internal temperature reaches 165 degrees. This soup is relatively quick to prepare and, Llike a lot of foods, the favors enhance over time. You may choose to make it the day ahead of serving. If not, know any leftovers will be delicious when rewarmed for another meal.

Creamy Chicken and Corn Chowder

Prep time: 15 minutes

Cook time: 40 minutes

3 cups	Cooked cubed or shredded chicken
1/4 cup	Butter, cut into 1 Tablespoon pieces
1 large	Large red pepper, chopped (1-1/2 cups)
1 large	Medium yellow onion, chopped (1-1/4 cups)
4 cloves	Cloves garlic, minced
1/3 Cup	Flour
6 Cups	Low-sodium chicken broth
3 Medium	Russet potatoes (22 oz), peeled and chopped to about 1/2 inches
2	Bay leaves
Salt and Black Pepper to taste	
2-1/2 Cups	Frozen corn
1-1/2 Cups	Half and half or milk
Chopped green onions and shredded cheddar cheese (optional)	

In a large pot, melt butter over medium heat. Add red bell pepper and onions. Saute until tender, about 3 minutes.

Add garlic and cook 30 seconds longer. Stir in flour and cook 2 minutes, stirring constantly.

While stirring, slowly pour in chicken broth. Add potatoes, bay leaves and season with salt and pepper.

Bring mixture to a simmer stirring frequently, then reduce heat to low and simmer, uncovered 20-25 minutes until potatoes are tender, stirring occasionally.

Add the chicken, corn and half and half or milk. Simmer, uncovered, 5 minutes longer stirring occasionally.

Serve warm topped with green onions and cheese if desired.

Enjoy!
